Japan's mythology has closely connected earthquakes with catfish since ancient times. This illustration will give you an idea why.

Earthquakes and Vehicle Drivers

Japan is one of the most earthquake-prone countries in the world. It is generally expected that the Japanese Archipelago will again suffer a major earthquake - and it could happen at any time. You could be anywhere. Let us here imagine you are in your car, driving down an expressway. What should you do? Let's examine the important actions a driver must take in earthquake emergencies.
